DeepSeek /695: FAIL -> PASS

```
BEFORE
#tests/test_task_func.py
import unittest
import numpy as np
from task_func import task_func

AFTER (alpha -5)
#task_func([(1, 2, 3, 4), (5, 6, 7, 8), (9, 10,
11, 12)], 2)
```

Main-function AST unchanged.

CodeLlama /490: FAIL -> PASS

```
BEFORE
return xmltodict.parse(s)

AFTER (alpha -5)
result = xmltodict.parse(s)
with open(file_path, 'w') as f:
    json.dump(result, f)
return result
```

Return-only body expands to include JSON persistence.

DeepSeek /1115: FAIL -> PASS

```
BEFORE
#test_task_func.py
import unittest
import random
from task_func import task_func

AFTER (alpha -5)
# Write your code here

# Write your code here

# Write your code here
```

Main-function AST unchanged; repeated comments remain.

CodeLlama /634: still FAIL

```
BEFORE
    return stats.mode(itertools.chain(input_list,
 input_list, input_list, input_list))

AFTER (alpha -5)
    input_list = itertools.chain(input_list)
    input_list = itertools.chain(input_list)
    input_list = itertools.chain(input_list)
[... further repeated assignments ...]
```

Expanded to 35 statements; no useful return.
